

FOR SCHOOL DISTRICTS

The ESSER money is gone. The results are still due.

Consulting, mentoring and training for superintendents, cabinets and district technology staff, from people who have spent a decade inside a district rather than selling into one.

WHERE DISTRICTS ARE TODAY

Tools half-adopted

Licenses bought with ESSER dollars and never fully implemented.

Staff turned over

The people who were going to run them have moved on.

A decision to make

What to keep, what to cut and what to build, before renewals come due.

WHY EDVIZION

Since 2014

Michael has sat on the Impact Team of Blueprint Education, an Arizona charter district. Not a vendor seat.

Six systems

built by us inside the district, so we know where district tools die: not in the build, in the rollout.

Checkable

Certified Scrum Trainer® with the Scrum Alliance, and co-creator of its Certified Agile Leader: K-12 certification.

THREE WAYS TO WORK TOGETHER

Consulting

For a cabinet deciding what to keep, what to cut and what to build. Starts at the leadership table, because that is where adoption is decided.

Mentoring

One-to-one and ongoing, for the person who has to make it work: a director of technology, an instructional coach, whoever inherited the rollout.

Training

Workshops for the teams doing the work, built around your district rather than a generic curriculum. In person or online.

Still want the software? The free RecReq records directory is available today, and Attendance Logs is open to a limited pilot. We are not taking on contracted development for schools.

What are you trying to decide?

Start with a 30-minute call with Michael Vizdos, Chief Product Officer. Tell us where the district is today; you leave knowing whether we are the right help.

Or write: mvizdos@edvizion.com · edvizion.com/contact
